Hook on! Twist round! Clamp!

'CLAMPON'—the NEW quick-fix heavy duty dual wheels from Bettinson.

1. The inner frame bolts on to the tractor wheel and fits neatly into the wheel dish. Once fitted you can forget it.
2. No need to position tractor wheel—wherever it stops you can roll the dual wheel approximately into place. Then a quick lift and the outer frame is hooked on.
3. Now just turn the wheel on its two hooks until the lugs drop into position.
4. The over-centre clamps are then easily locked with the extension bar supplied, and you're away.

It's normally a quick, one-man job to fix Bettinson 'Clampon' heavy duty dual wheels. And even easier to take them off. But once in position they are so strong there's no possibility of them distorting or loosening even on high horse-power tractors and heavy soil.

Because they're better—Bettinson and British—we anticipate a big demand.

Order yours NOW!

KRONE Turbo PRECISION

Krone AM Turbo Mowers and Mower Conditioners

These Krone AM turbo mowers with working widths of 2.00m, 2.40m and 2.80m are a new development for 'all-condition' mowing. In tests, operatives were impressed by the simple construction, easy maintenance and extremely smooth operation due to the special design of the cutting disc drive — an exclusive Krone development.

Of course, precision engineering is just what you'd expect from one of the world's leading names in farm equipment. Contact us for details of the new turbo mowers and for Krone's whole range of rugged, reliable machinery.
